

Profile

Isuzu Motors Limited was founded in 1916, making it one of Japan's oldest automobile manufacturers.

In addition to the manufacture and sale of commercial vehicles (CV) and light commercial vehicles (LCV) including heavy-duty trucks and buses, light-duty trucks, and pickup trucks, core group businesses include the manufacture and sale of engine components and related businesses in Japan and overseas.

As well as manufacturing and assembling heavy-duty trucks and light-duty trucks at our Fujisawa Plant in Japan, we practice a local approach to production under which components supplied from the plant are assembled at affiliated plants worldwide.

Pickup trucks are produced in Thailand and exported worldwide. Engines, one of the Company's principal non-vehicle products, are produced in Japan, Asia and the United States.

In Japan, products are sold through domestic sales companies. Overseas, products are sold through Isuzu Group companies' sales networks, General Motors Group companies' sales networks, trading companies, and other partners.
