## 1. Overview of Financial Results and Financial Position

### (1) Overview of Consolidated Financial Results

As for the overview of financial results, please refer to the earnings report of FY2026 Third Quarter Financial Results (April-December 2025) posted on the Company's website (<https://www.isuzu.co.jp/world/company/investor/>) today (February 12, 2026).

### (2) Overview of Consolidated Financial Position

#### (i) Assets, Liabilities and Equity

Total assets as of December 31, 2025 rose 244.7 billion yen from the end of previous fiscal year to 3,548.0 billion yen. This was mainly due to increases in inventories of 87.2 billion yen, cash and cash equivalents of 42.3 billion yen, and property, plant and equipment of 42.0 billion yen.

Liabilities increased by 146.6 billion yen from the end of the previous fiscal year to 1,912.3 billion yen. This was mainly because of an increase interest-bearing liabilities of 137.2 billion yen, partially offset by a decrease in trade and other payables of 3.4 billion yen.

Equity increased by 98.0 billion yen from the end of the previous fiscal year to 1,635.7 billion yen. This was mainly due to the recording of 121.2 billion yen in profit attributable to owners of parent and an increase in other components of equity of 73.5 billion yen mainly due to an increase in exchange differences on translation of foreign operations, partially offset by a decrease in retained earnings of 64.9 billion yen as a result of dividend payments and purchase of treasury shares of 50.0 billion yen.

The ratio of equity attributable to owners of parent to total assets stood at 41.0%, compared with 41.6% at the end of the previous fiscal year.

Interest-bearing liabilities increased by 137.2 billion yen from the end of the previous fiscal year to 896.1 billion yen.

#### (ii) Overview of Cash Flows

Cash and cash equivalents (hereinafter referred to as "funds") as of December 31, 2025 increased by 42.3 billion yen from the end of the previous fiscal year to 401.0 billion yen as a result of the use of funds provided by operating activities for investing activities and financing activities.

The situation of each type of cash flow during the nine months ended December 31, 2025 and the contributing factors are as follows:

##### [Cash Flow from Operating Activities]

Funds provided by operating activities amounted to 137.7 billion yen, up 20.3% compared to the same period of the previous fiscal year.

This was mainly due to inflows of funds of 195.6 billion yen and 113.5 billion yen recorded for profit before tax and depreciation and amortization, respectively, partially offset by outflows of funds of 56.3 billion yen from an increase in inventories and 48.2 billion yen from income taxes paid.

##### [Cash Flow from Investing Activities]

Funds used in investing activities amounted to 100.6 billion yen, down 21.2% compared to the same period of the previous fiscal year.

This was mainly due to outflows of funds of 111.4 billion yen from purchase of property, plant and equipment.

##### [Cash Flow from Financing Activities]

Funds used in financing activities amounted to 28.1 billion yen, up 86.8% compared to the same period of the previous fiscal year.

This was mainly due to outflows of funds of 55.8 billion yen from a decrease in short-term borrowings, 90.2 billion yen from repayments of long-term borrowings, 50.0 billion yen from purchase of treasury shares, 64.3 billion yen from dividends paid, and 25.8 billion yen from dividends paid to non-controlling interests, partially offset by an inflow of 232.1 billion yen from execution of long-term borrowings.

### **(3) Explanation of Consolidated Earnings Forecast and Other Forward-Looking Statements**

There has been no change to the full-year consolidated earnings forecast released on May 14, 2025.

- \* The Company calculated this forecast for the fiscal year ending March 31, 2026 by consolidating the information available at this moment of various markets around the world to figure out the expected timing of demand recovery. The forecast also includes risks and uncertainties such as global economic and market trends and exchange rate fluctuations. The Company's actual consolidated financial results may differ considerably from the forecast above, which therefore should not be the sole basis for any investment decisions.
