

Isuzu is moving forward on research and development in the latest technologies for trucks, buses, pickup trucks and diesel engines with a focus on cleaner, more environmentally friendly diesel and hybrid technologies so that we can offer products and services that satisfy the needs of our customers around the globe with minimal environmental impact. For the sake of the future of our planet, we are working to develop clean diesel engines and promoting the more widespread acceptance of vehicles that use low-

Isuzu Technology

emission CNG and LPG fuels. We are also

forging ahead on the development of clean energy vehicles such as ultra-low

PM emissions diesel vehicles, diesel-engine-based hybrid vehicles, and vehicles that run on dimethyl ether (DME), an alternative energy fuel. Isuzu is pouring a tremendous amount of effort into this research and development, and making a broad

contribution to society through the resulting advances in vehicle technology.

Forward-Looking Statements

This annual report contains forward-looking statements about Isuzu Motors Limited's plans, strategies, beliefs and future performances. These forward-looking statements are based on current expectations, estimates, forecasts and projections about the industries in which Isuzu Motors Limited operates, and management's beliefs and assumptions. As the expectations, estimates, forecasts and projections are subject to a number of risks, uncertainties and assumptions, actual results may differ materially from those projected. Isuzu urges readers to exercise due divergence/discretion when making investment decisions.
