

Isuzu Outlook of resume of production

We would like to announce our outlook of resume of production as follows.

1. Isuzu plants

Fujisawa plant(Fujisawa-city, Kanagawa Prefecture) and Tochigi plant (Tochigi-city, Tochigi Prefecture) are both in final examination of machinery and equipment necessary to resume production. We are scheduling to resume powertrain units production on April 1 and vehicle production and knock down parts production on April 5 gradually where possible. We would adjust our plant operation based on condition of parts procurement, supply of electricity and related transportation, etc.

2. Affiliate companies for parts production

Our affiliate companies for parts production are on process to resume their production to meet Isuzu's plan for resume of production.

3. Dealerships

Updated information for available service shops that are located in Iwate, Miyagi, Fukushima and Ibaraki Prefecture is on our website.

4. Other

To support the judgment of possible route for transportation and operation of trucks in affected regions, "Travelable route for Trucks" is available on our website. This information is based on the data utilized from our vehicle telematics system, "Mimamori-kun Online Service".
