Change of Company Holidays during Summer

To everyone affected by the Great East Japan Earthquake, we offer our deepest sympathy.

We have been working hard to reduce power consumption since the earthquake. To deal with possible electric power supply shortage in the summer and in line with the policy of the Japan Automobile Manufacturers Association, Inc., we have decided to shift our weekly holidays from Saturday and Sunday to Thursday and Friday from July 1 to September 30. This temporary corporate calendar does not apply to some departments that interface with customers.

We regret that this change to our summer weekly calendar may adversely affect many people. At the same time, we appreciate your understanding of our company's response to the urgent need for power consumption reduction.
