

"Light Downs" as part of "Cool Earth Day 2015"

As part of a citizens' initiative to prevent global warming Isuzu participated in the "CO2 Reduction / Light Down Project."

Through this Isuzu was able to conserve about 50 kwh of energy (equivalent to the energy used by a 30W fluorescent bulb made for home use over the course of 1,700 hours).

Examples "Light Downs" in Isuzu Fujisawa Plant

Location	Fujisawa Plant		
	Monozukuri Service Training Center (Isuzu Logo)	New Office Building (Isuzu Logo)	Plant main gate
