

**Isuzu held a special class about the DeuSEL® Project at elementary school.**

The visiting lecture was held on November 19th with three classes of the fifth grader at Sakado Elementary School in Kawasaki, Japan.

It was held a second time in January of this year at Kozan Junior High School. On this occasion Isuzu brought the DeuSEL® bus in cooperation with project partner Euglena Co., Ltd.

A view of the visiting lecture

The children took notes as they listened to the presentation attentively, and shouts of joy resounded throughout the DeuSEL® bus when they had a chance to ride around in it.

Their homeroom teachers also offered words of praise, saying, “As a class on environmental education it was beneficial and very easy to understand.”

There was no end to questions, even during break time.

Much excitement about the DeuSEL® bus.
