

Special Class on DeuSEL® Project Held at Elementary School

On February 23, a visiting lecture on the DeuSEL® Project was held for 98 pupils in three fifth-grade classes at Higashi-kashiwagaya Elementary School in Ebina, Kanagawa Prefecture.

This was the fourth such lesson, and once again Isuzu brought the DeuSEL® bus in cooperation with project partner Euglena Co., Ltd.

The lesson revolved around why this project was launched, what the concerns for the future of the world are, and a description on the microalgae euglena and its wonderful properties, and the children took notes as they listened intently. Shouts of joy resounded throughout the DeuSEL® bus when they had a chance to ride around in it later

Listening intently to the explanation about the DeuSEL® project
