

Isuzu awarded the Best Contribution to Resilience Award (Energy) at the 2017 Japan Resilience Awards

At the 2017 Japan Resilience Awards, which were organized by the Association for Resilience Japan and held on 15th March, Isuzu was awarded the Best Contribution to Resilience Award (Energy) for its initiatives in the development of natural gas automobiles.

The Japan Resilience Awards were first held in 2015. Their aim is to commend and congratulate leading corporations and organizations that, through technological and product development that contributes to the creation of a strong and flexible nation, help create a resilient society for future generations.

Isuzu was given an award this year for its contributions to energy security and national resilience, such as domestic launches of large CNG trucks, and the application of MINAMORI data during earthquake disasters.
